

5mm RD180™ | ACCURACY

- Allows for precise, automated suture placement
- Only 5mm suturing device designed for MIS cuff closure

10mm RD180™ | FLEXIBILITY

- Larger device tip enables an extra large tissue bite
- Allows incorporation of mucosa and peritoneum in one bite

SP™ RD180™ | SINGLE PORT

- Longer, angled shaft for excellent ergonomics
- Enhanced visibility for single port hysterectomy

5mm TK™ | SECURITY

- Automatically place knot and trim suture in seconds
- Faster, easier and more reliable than hand-tying

CUFF CLOSURE MADE EASY

scan to learn how easy cuff closure can be with **RD180™** and **TK™** automated suturing and knot tying technology.
